OFFICE OF THE DIRECTOR,

Dated, Bangalore, 9th September *193*0

FROM

C. RANGANATHA RAO SAHIB, Esq., B.A., B.L.,
Director of Industries and Commerce in Mysore,
(Bangalore, India.)

To

Seri. 25-30-1

B. Narayanaswamy Iyengar, Esq., B.A., B.L.,
Secretary to the Government of Mysore,
Development Departments, Bangalore.

SIR,

Subject - Aided Grainages - Bonus

I have the honor to state that under orders of Government issued in No. D. 684-5/Seri. 121-28-2 dated the 19th July 1929 bonus at the rate of Rs 5/- per 1,000 layings is now being paid to the aided Grainages for a period of two years after the esta-blishment of the grainage. Altogether 11 aided grainages have so far been started, of which, two began work in June 1928. The two aided grainages started in June 1928, have completed two -- years by June 1930. Six more aided grainages are proposed to be started during the current year. The total number of aided grainages that will therefore be working at the end of this -- year will be 17.

The Superintendent of Sericulture recommends that the present rate of bonus i.e., Rs 5/- per 1,000 layings may be continued to be paid for a period of ten years after the establishment of - the aided grainage. I enclose a copy of the letter of the Super-intendent of Sericulture.

In view of the fact that these aided grainages are required to grow into self-supporting institutions as early as possible, I do not think it desirable to continue the payment of the bonus - for the period of ten years recommended by the Superintendent of Sericulture. As the expenditure incurred in the preparation of

of Disease free layings is still high and the receipts obtained by their sale is not adequate to compensate the expenditure incurred in their preparation, I beg to recommend that half the usual rate of bonus may be authorised to be paid to the aided grainages for a further period of three years i.e., 3rd, 4th, and 5th year after starting. This concession may be continued till we have about 50 aided grainages in the State. I request that the sanction of Govern -ment may be obtained in this matter early.

For purposes of estimating the total amount that will have to be spent as bonus during the 3rd, 4th and 5th years, it may be assum -ed that each aided grainage will prepare and supply layings as per details in the margin. The amount of bonus that will have to be paid to each aided grainage at half the usual rate i.e., Rs 2/8 per 1,000 will amount to about Rs 1,000/- for all the three years.

3rd year	1,00,000	Layings
4th "	1,25,000	"
5th "	1,50,000	"

I have the honor to be,
Sir,
Your most obedient servant,

C Ranganatha Rao Sahib

Director.

C. Ranganatha Rao Sahib, Esq., B.A., B.L.,
Director of Industries and Commerce in Mysore,
Bangalore.

SUBJECT AND REFERENCE—

SIR,

With reference to your No. D4-1263/29-30 of 19-6-1930 and in continuation of my No. 7160 of 1-6-1930, I have the honour to submit the following proposals re' aided grainages:-

Government in their order No. D.8848-9/Seri.27-27-5 of 27th February 1928 sanctioned certain concessions to private people starting aided grainages. One of the concessions sanctioned was that each aided graineur should be paid a bonus of Rs 5/- only for every 1,000 layings prepared and distributed from the grainage. This concession was sanctioned for one year only to start with. Government in their order No. D.684-5/Seri. 121-28-2 of 19th July 1929 ordered that the bonus should be paid to each aided grainage for a period of two years after the establishment of the grainage.

Agreeably to the Government Orders, two aided grainages were started in June 1928, three in the year 1928-29 and six in the year 1929-30. The two aided grainages started during 1927-28 are not entitled to any bonus after June 1930 since the period of two years for which Government sanctioned the bonus elapses by end of June 1930. These two aided graineurs now represent that they would be hard fit if Government stop the payment of bonus now and they putforth the following reasons for continuing the

bonus

bonus:-

1. They have to start the work newly, have no previous experience, have to do a lot of preliminary work to secure the clients, organise the work, etc. and this takes them a larger part of the period of two years.
2. They have to arrange for obtaining seed cocoons from seed areas, for distribution of layings, for inspection of crops of raiyats, and for instructing the raiyats at their own cost.
3. They have to sell the layings at the same rate at which layings are being sold by Government Grainages though Government have given the option of selling price of layings to the aided graineurs as the raiyats are unwilling to pay higher rates than they pay to Government Grainages.
4. They have to prepare and sell Pure Mysore layings only though the sericulturists are very anxious to obtain cross breed layings and the demand for Pure Mysore Layings has to be created with some trouble.

For the above reasons, the aided graineurs pray that the bonus may be continued to be paid to them so long as the Government Grainages also prepare and sell layings direct to the sericulturists.

I feel that there is a good deal of force in the argument of the aided graineurs. Whenever layings have to be sold by Government Grainages, the staff of the Department tour round, collect indents, distribute layings, watch the crops of raiyats, render them help in rearing and see that as many of the raiyats as possible harvest successful crops. All this means expenditure to Government on pay and travelling allowances. The Government Grainages generally obtain their seed cocoon supply from the several Seed Campaign Officers and the cost of selection of cocoons for seed, purchase and transport charges are borne by Government. The aided graineurs also have been receiving their seed cocoons with the help of Seed Campaign Officers, as far as possible, but they generally send their own men for seed cocoons and the transport charges, etc. are all borne by the aided graineurs.

The

The aided graineurs are doing the work of the staff of the Department regarding supply of layings, inspection of crops of raiyats and instructing the raiyats in improved methods of rearing to enable the raiyats to harvest successful crops as otherwise the aided graineurs will lose their clients, as the sericulturists generally attribute the loss of crops to the seed though the crops may have been lost due to the fault of the rearers.

The aided graineurs have not been permitted to prepare cross breed layings as they have not got all the facilities to do this work and as this work requires considerable skill and equipment.

The aided graineurs have to sell the layings at the same rate as the Government Grainages as they have to overcome the competition from local professional seed cocoon vendors who generally sell the seed cocoons on credit. The Government Grainages cannot stop supply of layings direct to raiyats as the aided grainages are not yet in a position to meet in full the demand for layings. The aided grainages are merely supplementing the work of the Government Grainages.

In Japan, Government Grainages do not supply layings direct to the sericulturists who rear the silk-worms for producing reeling cocoons. The layings are supplied to seed rearers who are also graineurs and it is the business of the graineurs to prepare layings, get the moths examined in Government Inspection Stations and sell the layings to people rearing worms for reeling cocoons with the certificate of the Government Inspection Stations. The rate to be charged for layings is fixed not by Government, but by the several guilds of the graineurs. These graineurs have no competition from professional seed cocoon vendors as the sale and use of unexamined layings is prohibited by law. The sale and use of unexamined layings cannot yet be prohibited in Mysore as the number of aided grainages is still too small to meet the demand for layings of raiyats of the whole State. Government Grainages cannot stop sale of layings to raiyats for the same reason. The sale of layings from Government Grainages to raiyats for producing reeling cocoons can be stopped and the sale and use of unexamined layings can be prohibited in Mysore when we have established a large number of aided grainages all over the sericultural parts of the State and when these grainages are

capable

capable of meeting in full the demand for layings from the sericulturists fromall over the State. When we have reached this stage then the Government Grainages can concentrate their attention on the supply of cellular seed purely for re-productive purposes, leaving the aided grainages to supply layings to the sericulturists under the guidance of the Government Grainages. When Government Grainages stop sale of layings to rearers of worms for reeling cocoons, the aided grainages will be in a position to fix the sale price of layings so as to get a decent income. Until this goal is reached, it is absolutely necessary to encourage the starting and working of aided grainages by private people.

There is another advantage in encouraging private people to start aided grainages. The aided graineurs have to secure clients in order to find a sale for their layings. The sericulturists will have confidence in an aided graineur who sees that the crops of all the people who take layings from him are successful. The aided graineur has to take pains to secure good seed cocoons, to put only good layings on the market and to instruct the rearers in improved methods of rearing, etc. as all these items of work help in the harvesting of successful crops from layings distributed. Whether an aided grainage can be made to yield a profit or not, depends mostly upon the confidence of the clients secured by the aided graineur. The aided graineur has to go out of his way to help the client to secure good crops. The object of Government is to see that all the sericulturists in the State harvest all their crops successfully. The aided grainages also have got to work with the same object as otherwise their income will be affected. The aided grainages so far started in the State have done very good work in this direction thus liberating our staff for work in areas which require attention.

I hope I have made it clear that the aided grainages have a very important part to play in the development of the silk industry in the State. In view of the importance of the aided grainages, I feel that Government should encourage these grainages as far as possible. One of the most important ways of encouraging these grainages

is

is to assure such grainages that Government would be paying the bonus on the work turned out of these grainages as this would be an assurance against losses, specially when the aided graineurs have to sell layings at the same rate as the Government Grainages.

I beg that Government Orders may kindly be obtained sanctioning the payment of bonus to each of the aided grainages for at least ten years after the establishment of each aided grainage. The expenditure to be incurred in this connection is fully justified as the silk industry in the State would be developed, as educated young men would be induced to start aided grainages in villages thus helping rural reconstruction work and as this would also find a remunerative occupation to educated young men thus solving the question of middle class unemployment to a certain extent.

I beg you will kindly obtain early orders of Government in the matter

I have the honour to be,

Sir,

Your most obedient servant,

Superintendent.
